

SOUTHERN SWEDEN DESIGN DAYS

For your participation in the 2025 Exhibition

For orders received after April 28, an additional charge of 50% will apply to the prices listed below.

25% VAT will be added to all prices.

Electricity:

Each exhibition area is provided with one 10A socket.

Location: *"somewhere within your exhibition area"*, either drawn on the floor or from the ceiling (varies).

For an additional fee, it can be ordered to a specific location within the exhibition area.

Price available upon request, with the attached drawing showing the desired location, company name, and name of the exhibition area if applicable.

This socket can handle 10A (amperes) = approximately 2300W (watts)

You can connect your own power strips to this socket if you need more outlets (example image below).

Alternatively, you can rent a power strip with 3 or 5 outlets from us for 150 SEK per strip.

These sockets can be loaded with a total of 10A/2300W.

If you need more outlets to connect additional equipment that together draw more power (more than 10A), you can order additional power supplies/outlets for an extra cost.

800 SEK each for an additional 10A socket.

SOUTHERN SWEDEN DESIGN DAYS

2500 SEK each for a 3-phase CEE 16A socket with a sub-distribution board.

If you are unsure about the power consumption/effect of the equipment you will be connecting, we are happy to assist you.

Please describe as detailed as possible WHAT you will be connecting and HOW MANY of each unit.

Attach a photo of the product, preferably showing the brand/model, and if possible, include the wattage of the product.

Image/LED Screen

Rental of 4K LED Screen with HDMI input, on floor stand.

65" screen price: 6500 SEK

75" screen price: 8500 SEK

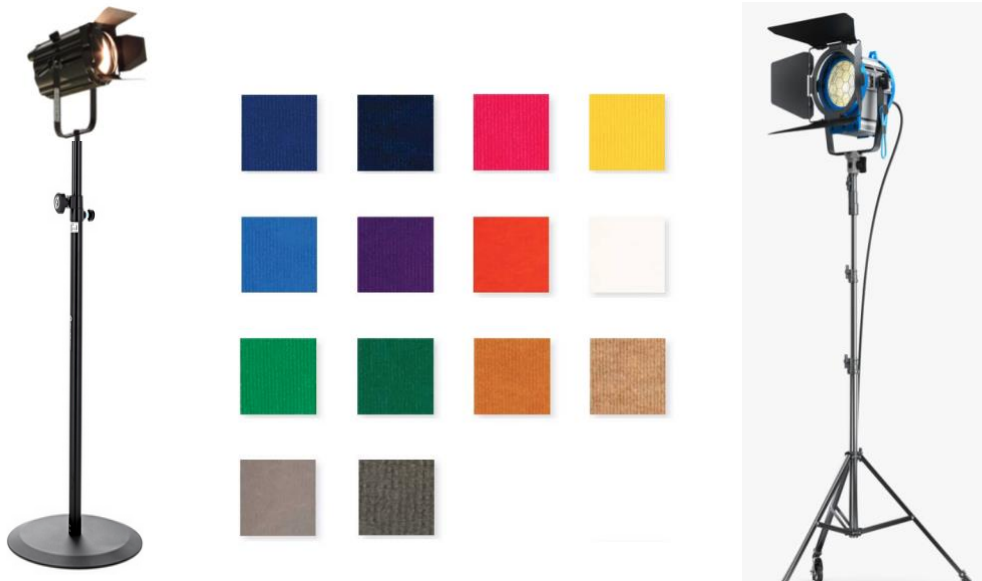

Lighting:

Lighting for exhibition spaces in the form of "theater spotlights on stands" which not only provide a physical framing and positioning of the space but also, through the light, offer exposure of the exhibition area & the objects/people.

Price example: 2 spotlights on stands as shown in the example images above: 4250 SEK, installed and ready, including electricity.

It can also be complemented with a floor mat (in any color). 200 SEK per m², including labor, laying, and taping.

Sound:

Perhaps you'd like background music in your exhibition area?

Or be able to give a presentation to an audience?

If desired, you can rent a sound system with connections for your own iPad/phone, as well as a wireless/wired handheld microphone or headset microphone.

Hanging of Signs, Products, or Other Items:

In various locations in the hall, it may be easier or more difficult to hang things from the ceiling, depending on factors like ceiling height, placement in relation to beams, crumbling concrete in some areas, etc., as well as the weight/size of the items you wish to hang. Therefore, each request must be assessed separately.

If you wish to have something hung:

- # Take a few pictures of the location in the hall where this applies and mark on the image where you would like the hanging to be.
- # Attach the pictures along with a drawing of the hall with your exhibition area marked (from SSDD).
- # Describe what you want to hang:
- # Approximate size:
- # Approximate weight/load:
- # Desired height from the floor for the hanging
- # Describe the attachment points on your object (please attach a picture of the sign/object)

There are significant differences in costs for creating hangings in different areas of the hall due to the given circumstances.

For example, it's easier/cheaper to hang something directly under a beam than between two beams.

Please indicate both in text and on the drawing whether you want the hanging to be at an absolutely fixed point or if it can be "*within a certain area, +/- ...*" or "*somewhere within the exhibition area.*"

Lift work including 1 technician: 1750 SEK/hour

Extra technician for hanging/assembly, etc.: 750 SEK/hour
